

SNESPi Case for Raspberry Pi 3 (with cooling fan)

Use this "SNES" inspired case to create a retro gaming console or just make your Pi more visually pleasing. The case includes a cooling fan which plugs straight into your Pi and keeps it cool during those long hours of use.

This unique design is made out of durable plastic and was designed to fit perfectly on any Raspberry Pi with a 40 pin header such as the Raspberry Pi 3, 2, B+ We've taken our popular 3D printed design and upgraded it to an injection molded case for superior surface finish, colour, and overall quality.

Specifications include injection molded for strength and durability, full accessibility to board ports, rubber feet for grip, aesthetic power/reset switches, cooling fan, LED light hole, high quality hardware, improved ventilation for optimal use. The air vents provide good ventilation while in use.
