

The Look Of Stainless Steel Braid With An Upside

No installation hassles. No surface abrasion. No ridiculous expense.
Just the look of polished braided steel.

These heavy duty metallized Mylar® sleeves are ideal for dressing up any application with the look of braided stainless steel. The standard CHROME (CHN) has a more open look, with transparent PET braided together with the metallic strands, to create a slight glimmer when light strikes it, and to allow the color of the application to come through for a special effect. Our X-tra coverage product, CHROME XC (CXN), provides fuller coverage with no transparent elements in the braided construction and results in a smooth, continuous metallic shine on any application.
