

Microsemi 12 Gbps Smart I/O Controller for Storage

8-Port SSCi+ and SSCie+

Microsemi's SmartIOC SAS I/O Controller products provide reliable ultra-high performance HBA functionality with industry-leading low-power operation. These SmartIOCs provide unparalleled flexibility along with a broad range of standard features designed to meet the most demanding server storage applications.

The PM8222 and PM8225 offer optional entry-level hardware RAID 0/1/10/5 modes without any external DRAM.

The PM8222 and PM8225 support Microsemi Smart Storage solution drivers for all major operating systems and a comprehensive set of management tools, including a GUI and CLI.

Highlights

- Industry-leading throughput
- Compatible with Microsemi Smart Storage solution drivers for all major operating systems and Microsemi Smart Storage solution unified management utilities
- RAID 0, 1, 10, 5 with hardware acceleration and no additional host software requirements
- Introduces hardware RAID 5 at no additional cost
- No DDR memory required, regardless of mode
- The PM8225 includes support for maxCrypto controller-based encryption

HBA Features

- Persistent logging and binding
- Up to 1.4M IOPS performance (4K random reads)
- Up to 6.9 GB/s bandwidth
- Transport Layer Retry (TLR) support
- Multi-initiator (host)/clustering for SAS
- TRIM and UNMAP support for SSDs
- SAS dual path failover (RAID stack managed Active/Standby)
- Baseboard management controller (BMC) support with Management Component Transport Protocol (MCTP) over PCIe or I²C
- 4k native sector support
- Hot plug drive support
- Adapter power management modes
- S.M.A.R.T. diagnostic access
- SMP commands using ARCONF
- Supports eight lanes of PCIe 3.0 to the host, each lane supporting PCIe Gen 3 rates up to 8.0 Gbps
- Enclosure Management: SES-2/3; SGPIO: SFF-8485; IBPI: SFF-8489; SGPIO as a virtual SES enclosure: SFF-8448

Entry-Level RAID Features

- Flexible configuration for RAID mode
- Dynamic sector repair
- Multiple LUN support
- Support for up to 238 raw devices
- Support for up to 32 target devices in RAID mode
- Supports up to eight SAS/SATA Logical/RAID volumes
- Split mirror and combine
- Copyback hot spare
- Displays raw devices on connector
- RAID Build modes
 - Quick Initialization
 - Background Initialization
 - Rapid Parity Initialization
- Heal array and Move array
- Bootable array support
- Erase drive
- Configurable stripe size
- Bad stripe marking
- Hot spare support (dedicated, global, or predictive)
- Persistent logging for RAID and HBA
- 4K native sector support in RAID

Microsemi Storage Management Utilities

MaxView provides both server-based and remote administration. This fully browser-based tool supports all standard browsers and also is available through a USB boot image. MaxView controller management components include:

- MaxView GUI
- ARCCONF CLI
- Event Monitor (event logging and email alerts)
- VSphere plug-in
- OpenStack plug-in
- Smart Storage Administrator CLI

Microsemi 12 Gbps Smart I/O Controller for Storage

8-Port SSCi+ and SSCie+

Tools for Setup and Troubleshooting

Microsemi provides a complete suite of design-in collateral to support embedded designs with this product including: reference designs, detailed hardware specifications and design-in guides.

- UEFI HII configuration tool
- CTRL-A Legacy BIOS configuration tool
- ChipLink diagnostic tools
 - Extensive debug, diagnostics, configuration, and analysis tools with an intuitive GUI
 - Access to configuration data, management capabilities, and signal integrity analysis tools such as real-time eye capture
 - Connects to device over UART

Operating System Support

- Extensive operating system support includes major software releases for Microsoft Windows/Server, VMware ESXi, Red Hat Enterprise Linux, SUSE Enterprise Linux, Ubuntu, CentOS, XenServer, Fedora, Debian, and Solaris
- Certification for Microsoft WHQL, VMware IOVP, and VMware VSAN

High-Speed I/O

- x8 PCIe Gen 3 8 GT/s
 - PCIe link rates supported: 8 GT/s, 5 GT/s, 2.5 GT/s
 - PCIe-compliant link training and manual PHY configuration
- 8x SAS-3 PHYs for high-speed targets
 - SAS link rates supported: 12 Gbps, 6 Gbps, 3 Gbps
 - SATA link rates supported: 6 Gbps, 3 Gbps, 1.5 Gbps
 - SAS or SATA operation on a per-PHY basis

High-Speed I/O (continued)

- Independent per-channel selectable high-speed outputs support multiple programmable levels of pre-emphasis and output swing
- Multiple programmable levels of receive equalization
- Integrated resistive termination
- Automatic negotiation of link speed
- Decision Feedback Equalizer provides robust recovery of 12 Gbps SAS signals over lossy channels

Peripheral I/O Interfaces

- Seven multi-master and two master-only two-wire interfaces (TWIs) support variable bit rates up to 400 Kbps
- Two industry-standard 16750 UARTs
- Seven SFF-8485-compliant serial GPIO (SGPIO) ports
- Up to 30 GPIO ports depending on SGPIO port configuration
- Firmware API for peripheral control including features such as activity LED, UART configuration, zoning configuration, inter-processor communications, and enclosure control

Note: Some peripheral I/O interface pins are multiplexed.

maxCrypto Encryption (PM8225 Only)

- AES data encryption and decryption with key sizes of 128/196/256 bits

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees globally. Learn more at www.microsemi.com.

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer.
